

Brain Landscape The Coexistence of Neuroscience and Architecture, 2008, 280 pages, Washington John P. Eberhard Latrobe Fellow American Institute of Architects College of Fellows, DC Founding President The Academy of Neuroscience for Architecture San Diego CA, 019971584X, 9780199715848, Oxford University Press, 2008

Brain Landscape: The Coexistence of Neuroscience and Architecture is the first book to serve as an intellectual bridge between architectural practice and neuroscience research. John P. Eberhard, founding President of the non-profit Academy of Neuroscience for Architecture, argues that increased funding, and the ability to think beyond the norm, will lead to a better understanding of how scientific research can change how we design, illuminate, and build spaces. Inversely, he posits that by better understanding the effects that buildings and places have on us, and our mental state, the better we may be able to understand how the human brain works. This book is devoted to describing architectural design criteria for schools, offices, laboratories, memorials, churches, and facilities for the aging, and then posing hypotheses about human experiences in such settings.
